NEWS RELEASE

August 20, 2018

Asset Management One International Ltd. launches innovative new AI Deep Learning UCITS offering for EMEA institutional and wholesale investors

Asset Management One International Ltd., a subsidiary of Asset Management One Co., Ltd., announces the launch of the AI Deep Learning Global Equity portfolio as the latest addition to the AMO range of Luxembourg domiciled UCITS funds, bringing innovation to equity investments. The fund utilises Deep Learning, an Artificial Intelligence (AI) technique, investing predominantly in global equities to obtain capital growth.

AI Deep Learning Global Equity

The AI Deep Learning Global Equity portfolio brings innovation to equity investments, utilising a proprietary deep learning model which primarily uses the financial data of investable stocks as input data. The model is powered by Deep Learning, a breakthrough in the development of AI, which is able to capture and identify even obscure concepts through continuous learning and make its own, unbiased judgment based purely on data supplied. The pioneering algorithm uses a model which mimics the human brain to learn from past events and analyse data, covering over 10,000 companies globally with twenty years of data. The portfolio is constructed using an optimiser in an aim to generate stable returns over the medium- to long-term and outperform the MSCI ACWI Index.

The fund is managed by Fund Manager Mr. Junichiro Tobita at the Tokyo headquarters, supported by three Fund Managers and further supported by the Strategic Investment Solutions Group.

About Asset Management One:
